

HVAC VALIDATION OF CLEANROOMS AND ASSOCIATED CONTROLLED ENVIRONMENTS

Products and processes that benefit from the control of airborne contamination include those in industries such as aerospace, food, healthcare, medical device, microelectronics and pharmaceutical.

Cleanrooms and associated control environments which provide contamination control for industry require routine re-qualification in order to provide evidence of continued compliance with relevant standards.

The Legislation

The relevant standards are ISO 14644 'Cleanrooms & Associated Controlled Environments'; ISO 14698 'Cleanrooms and Associated Controlled Environments – Biocontamination control' and EU GMP.

For a full list of the latest legislation affecting the management of cleanrooms and associated controlled environments, please visit www.hberm.com

Our Services

HBE provides a service to verify the continued compliance of an installation to approved standards by performing specified tests and by documenting the results.

Our services include:

- Particle count test
- Airflow volume and airflow velocity test
- Room air change rate calculation
- Air pressure difference test
- Installed filter system leak test
- Recovery test
- Airflow visualization test
- Containment test
- Temperature and relative humidity test
- Noise level test
- Lighting level test
- System rebalancing
- Microbiological safety cabinets
- Glove box verification
- Hepa filter replacement
- LEV/fumehood verification
